Attorney's Docket No.:10559/094001/P7612/Intel Corporation

In the specification:

Please amend the paragraph beginning at page 6, line 14 as follows:

The data output 220 from the USB device controller is coupled to an information separator a pulse code modulated (PCM) transcoder 230 (or similar voice codec) for compression/~~decinoression~~ decompression, e.g. for bandwidth reduction. The system should retain compatibility, however, with standard 64K bit (PCM) data, to enable use of an analog modem connected to one of the voice adapter ports.
